About Me

iOS developer specialized in **Swift**, **SwiftUI** and **Objective-C**, currently expanding my knowledge in **Artificial Intelligence and Big Data**. I am passionate about creating innovative user-oriented solutions, delivering useful and quality experiences. I am seeking opportunities to apply my mobile development skills and contribute to challenging technology projects.

Experience

iOS Application Developer

Feb 2022 – Jan 2024

ALTEN SPAIN

- Application of **SOLID** principles, **Clean Architecture** and **Clean Code** in developing robust and maintainable applications
- Development for the Andalusian Regional Government (Sports Centers) using **SwiftUI** as the main framework
- Implementation of scalable and maintainable architectures following industry best practices

Junior iOS Application Developer

June 2021 – Feb 2022

ALTEN SPAIN

- Dependency management with CocoaPods and **SwiftPackageManager** (SPM) to optimize the development process
- Implementation of MVC and MVVM architectural patterns in production applications
- Development for KISS Media of KissFM and RockFM applications in **Swift**
- Maintenance of DIA application in **Swift** with focus on stability and performance
- Handling of Realm databases for efficient local storage

iOS Internship Training

Mar 2021 – June 2021

ALTEN SPAIN

- First steps in creating interfaces and business logic for mobile applications
- Development in **Swift** and **Objective-C** using UIKit and Foundation
- Practical training on iOS application development with focus on best practices

Education

IES Rafael Alberti

Oct 2024 – June 2025

Specialization Training Cycle in **Artificial Intelligence and Big Data**

- Reinforcement Learning, Large Language Models (LLMs) and Transformers
- Big Data with AWS, datasets from HuggingFace and Kaggle

CDP San Ignacio: Salesianos-Cádiz

Sept 2019 – June 2021

Advanced Training Cycle in **Multiplatform Application Development**

- Development with Java, Python, Django, Spring Boot, Laravel and Ionic
- Databases: MySQL, PostgreSQL, MongoDB and Firebase

I.E.S. Mar de Cádiz

Sept 2017 – June 2019

Intermediate Training Cycle in Microcomputer Systems and Networks

Skills

Languages & Frameworks: Swift, SwiftUI, Objective-C, UIKit, Foundation, Python

Tools & Technologies: XCode, CocoaPods, **SwiftPackageManager** (SPM), Git, Realm, Firebase

Methodologies: SOLID, Clean Architecture, Clean Code, MVC, MVVM, Agile

Areas of Knowledge: Artificial Intelligence, Big Data, iOS Development, Databases, Software Architecture

Languages

Spanish: Native

English: B2 Level (Upper-Intermediate)
